

DIVERSE RANGE OF GOLD INVESTMENT BARS

The range of standard and unusual gold bars, used as investment bars around the world, can be grouped into **46 categories**.

INVESTMENT BAR

In this section, a cast or minted bar is categorised as an **investment bar**, when known to have been issued by a recognised bar manufacturer or issuer at a low premium above the prevailing value of its fine gold content.

It can be observed that the bulk of bars manufactured worldwide is absorbed by jewellery, industrial and other fabricators, and that all cast and minted bars, when issued at a low premium, have the capacity to act as investment bars.

The categorization, used by The Industry Collection of Gold Bars Worldwide, is based on weight denomination, shape, decoration or a distinctive feature.

For a definition of a gold bar, cast bar and minted bar, refer to the website section, "**Definitions: Bar Types**".

In many countries, the kilobar (32.151 oz) is an important gold investment bar.

CAST			
London 400 oz bars	International	Block bars	Hong Kong
COMEX 100 oz bars	International	Square bars	International
Shanghai 3000 g bars	China	Round bars	International
