

“GREEN GOLD” BARS

Manufactured by
VALCAMBI SA
Switzerland

Valcambi SA manufactures “Green Gold” bars which enable the company’s customers to trace the source of the gold content of each bar.

Green Gold, if required, is available in the form of 400 oz bars, 1000 g and smaller cast bars, minted bars and grain.

The bars were launched in 2008.

TRACEABLE GOLD

Green Gold bars contain only newly-mined gold shipped directly to Valcambi for refining from selected mines.

Each bar is stamped with the company’s Green Gold logo, and in the case of 400 oz bars the letters “GG” precede the serial number.

The bars reassure fabricators and dealers, which require a guarantee of the precise origin of the gold content.

A web service enables them to obtain detailed information on the Green Gold bars they have purchased.

PRODUCTION

The company undertakes an entirely separate production process to ensure that Green Gold is uncontaminated. This even includes the use of dedicated crucibles.

In addition, whenever Green Gold is produced, an independent entity, Alex Stewart (Assayers) Ltd monitors all aspects.

As the production process incurs additional costs, Green Gold bars are made available as premium products at prices above normal cast and minted bars.

VALCAMBI SA

Valcambi SA, a leading international gold refiner and bar manufacturer, is located in Balerna, near Chiasso in south-eastern Switzerland. It was founded in 1961.

Valcambi is a private company, a wholly owned subsidiary of European Gold Refineries Holding SA. EGR shareholders are Newmont Minerals Holding BV (60.6%) and private equity (39.4%).

The company has manufactured London Good Delivery 400 oz gold bars since 1968.

Valcambi has issued Green Gold bars since 2008.

The bars are marked with the company’s Green Gold logo.

Green Gold bars contain only newly-mined gold from selected mines.

Manufacture is monitored by an independent entity.

Certificates guarantee that the bars contain Green Gold.

TEXT ON CERTIFICATE

Valcambi Green Gold is a premium quality precious metal product the origins of which are fully documented and independently validated.

Valcambi Green Gold is sourced only from mines which adhere to the highest standards of environmental stewardship and health and safety and human rights of their labour force.

The handling and processing of Green Gold by Valcambi is entirely segregated within our plant and is under the control of independent supervisory and audit processes.

Valcambi guarantees the very highest standards for “Valcambi Green Gold”.

Valcambi also produces 5 kg bottles of Green Gold grains for industrial customers.
