

ZIJIN MINING GROUP CO LTD

GOLD BAR MANUFACTURER IN CHINA

Zijin Mining Group Co Ltd, the largest gold producer in China, has its international headquarters in Fujian Province at Shanghang, which is located 200 km north west of the city of Xiamen.

It has two main gold refining and cast bar manufacturing plants:

Gold Refinery of Zijin Mining Group Co Ltd
(Shanghang, Fujian Province – East China)

Luoyang Zijin Yinhui Gold Refining Co Ltd
(Luoyang, Henan Province – South Central China)

The company's minted bars are manufactured in Xiamen at a factory that is part of Zijin Mining Group Sales (Xiamen) Co Ltd.

Fujian Province, which faces the Strait of Taiwan, has a population of 36 million. Xiamen is on the coast, 600 km north-east of Hong Kong.

ACCREDITATION

Gold Refinery of Zijin Mining Group Co Ltd

2006 London Bullion Market Association (LBMA)
2002 Shanghai Gold Exchange (SGE)

Luoyang Zijin Yinhui Gold Refining Co Ltd

2002 Shanghai Gold Exchange (SGE)

OWNERSHIP

Zijin Mining Group Co Ltd is a state-owned public company.

The major shareholder is Shanghang Minxi Xinghang State-Owned Property Investment Company (28.96%).

The company is listed on the Hong Kong Stock Exchange (2003) and Shanghai Stock Exchange (2006).

RANGE OF GOLD BARS

The company manufactures an extensive range of "standard" and "non-standard" bars.

"Standard" bars are defined as those that are London or Shanghai "good delivery". "Non-standard" bars are all other bars.

Gold Refinery of Zijin Mining Group Co Ltd

Cast: 400 oz, 3000 g, 1000 g

Luoyang Zijin Yinhui Gold Refining Co Ltd

Cast: 3000 g, 1000 g

Zijin Mining Group Sales (Xiamen) Co Ltd

Minted Investment Bars: 12.5 kg, 1000 g, 500 g, 200 g, 100 g, 50 g

Zijin Mining has its international headquarters in Fujian Province at Shanghang.

It is China's largest gold producing company.

The company manufactures Shanghai Good Delivery bars (since 2002) and London Good Delivery bars (since 2006).

It also manufactures an extensive range of investment and decorative bars for the Chinese market.

The factory in Xiamen also manufactures an extensive range of other minted bars with decorative designs and in unusual shapes.

The two refineries also manufacture other cast bars, including unmarked bars, for internal and external entities.

BACKGROUND

Zijin Mining Group Co Ltd, known by this name since 2004, was founded as the Shanghang County Mining Company in 1986, subsequently renamed Fujian Shanghang Zijin Mining Company in 1993, Fujian Zijin Mining Corporation in 2000 and Fujian Zijin Mining Group Company in early 2004.

It focuses on the production of gold, copper, silver and zinc. In addition to being China's largest gold producer since 2005 (90.33 tonnes from its own and external mines in 2012), it is also China's second largest copper miner (216,599 tonnes in 2012).

The company operates mines in 20 provinces in China, including 15 mines that produce gold. The largest gold mine (and the largest in China) is Zijin Shan Gold-Copper Mine (14 km from Shanghang), which has been developed since 1992.

Internationally (since 2005), the company has become involved in the production or exploration of gold through joint-ventures or subsidiaries in 5 countries: Tajikistan, Mongolia, Kyrgyzstan, Australia and Congo (DRC). It also mines other metals in Myanmar, Peru and Russia.

At **Shanghang**, a new gold refinery was opened in 2000. Gold refining had previously taken place at another site since 1993.

At **Luoyang**, the gold refinery has been in operation since the 1980s. It became a subsidiary of Zijin Mining, which owns a 70% shareholding, in 2005.

At **Xiamen**, Zijin Mining Group Sales (Xiamen) Co Ltd was established in 2011, its factory having operated since 2010. In the same year, shops to retail precious metal bars, medallions and jewellery were opened. There are now approximately 25 shops located in Beijing and Shenzhen, as well as in Fujian and Guizhou Provinces and the autonomous region of Xinjiang Uygur.

The gold refinery at Shanghang focuses on the refining of mine doré and semi-refined gold, with plans to refine scrap in the future. Gold refining methods include wet chemical parting and solvent extraction. Annual gold refining capacity: 20 tonnes fine gold.

The gold refinery at Luoyang is reported to have a larger capacity and annual gold output. In addition, gold refining also takes place at two other sites in Shanghang and Luoyang, at sites in Guizhou and Jilin Provinces and in Tajikistan.

Number of employees: 20,000 (Group)

Website: www.zjky.cn/english/ (Group)
www.zijingold.com (Minted bar factory at Xiamen)

Zijin Mining has refined gold in Shanghang since 1993.

The gold refinery in Luoyang was acquired in 2005.

The factory, which manufactures minted bars, was established in Xiamen in 2010.

TECHNICAL DESCRIPTION

Weight	Type	Fineness	Shape	Dimensions mm	Serial Number System	First Issued
London Good Delivery						
400 oz	Cast	999.9	Rectangular	255 x 81 x 37 237 x 57 (base)	6 numbers Plus Year Date	2006
Shanghai Good Delivery						
3000 g	Cast	999.5/999.9	Rectangular	320 x 70	2 Letters Plus 6 numbers	2002
1000 g	Cast	999.5/999.9	Rectangular	115 x 52.5	2 Letters Plus 7 numbers	2002
Investment						
12.5 kg	Minted	999.9	Rectangular	255 x 80 240 x 60 (base)	7 numbers	2012
1000 g	Minted	999.99	Rectangular	113 x 54 96 x 37 (base)	-	2012
500 g	Minted	999.99	Rectangular	83 x 40 70 x 27 (base)	-	2012
200 g	Minted	999.99	Rectangular	59 x 29 49 x 19 (base)	-	2012
100 g	Minted	999.99	Rectangular	51 x 26 42 x 17 (base)	-	2012
50 g	Minted	999.99	Rectangular	45 x 23 39 x 17 (base)	-	2012

Cast Bars – Serial Numbers

400 oz. 1st two numbers record the year of manufacture (e.g. “13” means “2013”). Next 4 numbers record the serial number within the year.

3000 g. 1st letter records SGE number: “1” = Refinery at Shanghai; “H” = Refinery at Luoyang. 2nd letter indicates gold purity: “X” = 999.9, “Y” = 999.5. 1st two numbers record the year (e.g. “13” means “2013”). Next 4 numbers record the serial number within the year.

1000 g. 1st letter records SGE number: “1” = Refinery at Shanghai; “H” = Refinery at Luoyang. 2nd letter indicates gold purity: “X” = 999.9, “Y” = 999.5. 1st two numbers record the year (e.g. “13” means “2013”). Next 5 numbers record the serial number within the year.

Zijin Mining manufactures Shanghai Good Delivery kilobars in Shanghai and Luoyang.

DISTRIBUTION

While almost all gold is compulsorily converted into good delivery bars for sale on the Shanghai Gold Exchange, the factory in Xiamen manufactures bars for Zijin’s own retail shops, as well as for banks, jewellery retailers and other entities. The gold to do this is normally supplied by the trade customer in the form of bars purchased from the Shanghai Gold Exchange.

The factory also manufactures customized bars for several banks, including:

- Bank of China
- China Merchants Bank of China (CMBC)
- Industrial and Commercial Bank of China (ICBC)
- China Xiamen Bank
- China Shanghai Pudong Bank

Refining gold at the refinery in Shanghai.

EXAMPLES OF SUPPLEMENTARY BARS

Issued progressively since 2010.

Name	Weights	Type	Fineness
